

Paper Recycling

Lisa got some handmade recycled writing paper for her birthday which she loves! It got her thinking though... she always puts out her old newspapers for recycling but isn't sure how recycling old newspaper can result in something so pretty. You need to find out how paper recycling happens and draw pictures to show each stage to help people understand the process (key words in each box should help you).

Trees	Paper Products
Recycling Bins	Paper Mill
Shred	Add Water
Roll and Dry	New Paper Products
